

AMENDMENTS TO THE SPECIFICATION:

Please amend the specification beginning on page 5, line 10 as follows:

Fig. 8 shows that co-expression of Jab1 and WNV-Cp leads to a decrease in caspase activity, Fig. 8A shows a graph for a result of measuring caspase activity to each protein, and Fig. 8B refers to the western blotting result for expression of protein";

Please amend the specification beginning on page 6, line 5 as follows:

Fig. 17 shows ~~a process of constructing a vector system for establishing a Jab1 adenovirus stable cell line~~ the determining of an expression of a vector for establishing a Jab1 adenovirus stable cell line. In detail, Fig. 17A refers to a result for western blot for pShuttle-IRES-hrGFP and Jab1, Fig. 17B shows a data for pShuttle-Jab1 and pShuttle-Cp, and Fig. 17C represents western blot data for Jab1 isolated by PacI enzyme after transformation; and
